LOVE YOUR LOOK

~Get rid of your frowned and furrowed brows, try Botox or Dysport~

Botulinum protein A has been safely used cosmetically for years to diminish facial wrinkles by relaxing facial muscles. These results can begin in as soon as 2 to 3 days and last anywhere from 90 day and upwards to 120 days or greater. All injections are performed by our Board Certified Medical Doctor, Joseph A. Astaphan, MD, DDS with over 13 years of experience in cosmetic injections. Your safety is of utmost importance to us.

We do not cut corners where your health is concerned.

At Silk, feel safe in knowing that ALL our purchasing is directly from the manufacturer or authorized distributor in the United States. We only buy Allergan brand Botox® and Dysport® made by Ipsen Biopharm, Ltd., and marketed by Medicis Aesthetics.

As well as smoothing your forehead lines, relaxing your furrowed brows and taming your crows' feet, Botox® Injections can also be used effectively as:

- An eyebrow lift
- Tipping your nose up
- Softening lip lines
- Turning the corners of your mouth upwards
- TMJ pain
- Migraine headache therapy

At Silk, there is no gimmick to getting Botox®. We use Allergan Botox® distributed in the United States. We do not charge per area. We charge per unit. What does that mean? We charge ONLY for what we inject. To become Botox® educated, [please read "Not All Botox® Is created Equal" here!](#)

Did you know that Dr. Astaphan is an advanced injector and has been injecting Botox® since 1998?

Dysport™

When comparing prices and lasers, it is important to ask what laser is being used, who is performing your treatments and what their qualifications are. Make sure you research which laser is appropriate for your skin

color and/or ethnic background. Living in a tropical climate such as Florida, makes it even more important to choose the correct facility and avoid adverse reactions from improper treatment. Did you know at Silk™ we only use "real" lasers and all services are performed by a qualified Medical Doctor every time?

Our Cynosure class 4, nd: yag and Alexandrite lasers make it possible for Dr. Astaphan to safely and effectively treat all skin colors. For tanned and darker color skin, the Nd:YAG is the safest laser for treatment. To avoid pigmentation complications, it is wise to avoid all other light sources except the Nd:YAG
